EDUCATION

University of California, Los Angeles (UCLA) **Sept. 2020 - Jan. 2023 (Expected)**
Bachelor of Science in Electrical Engineering *GPA: 3.631*

Coursework: Digital Signal Processing, Data Science & Machine Learning, Data Structure, Graph Theory, Analog Electronic Circuits, Logic Design of Digital Systems, Probability and Statistics

TECHNICAL SKILLS

Programming:	Python, C/C++, Matlab, Java, Verilog
Open-source Framework:	TensorFlow, OpenCV
Other Tools:	Latex, Adobe Premiere Pro, Adobe Audition
Language:	Vietnamese, English

EXPERIENCE

UCLA Speech Processing and Auditory Perception Lab **Jun. 2021 - Sept. 2021**
Undergraduate Research Assistant *Los Angeles, California*
- Trained an End-to-end model using Automatic Speech Recognition (ASR) with Transformer
- Filtered signals and analyzed data
- Collaborated with a Ph.D student to enhance the accuracy of the model

PROJECTS

Plant Pathology - Machine Learning on Embedded System | *Python / C - STM32 H743ZI2* **In Progress**
- Create a deep learning model to classify diseases in apple trees
- Embed the weights of the pre-trained model into Microcontroller STM32 H743ZI2 board
- Develop the Convolutional layer, Max pooling layer in C

Spam Email Classification | *Python - Jupyter Notebook* **2021**
- Extracted words and calculated their probabilities based on Naiive Bayes Theorem
- Optimized the model by using Scikit-learn library
- Achieved the accuracy of 97%

Pooling Filter | *Verilog* **2021**
- Designed and simulated a pooling filter digital circuit in Verilog
- Reduced the size of an input image while keeping relevant features of the input and discarding irrelevant information

Line Following Car | *MSP 432, C++* **2020**
- Utilized MSP432 microcontroller to operate a line following car robot to follow designed curved path
- Completed a round trip in 9s for a track with 52 5/8 inches long and about 6 1/8 inches wide

Fire Warning Device | *Micro-controller 8051, C* **2016**
- Developed an electronic device using Micro-controller 8051 to control some environmental conditions
- Programmed to measure temperature, humidity, gas, current and displayed on a LCD soldiered on the circuit

AWARD

Encouragement Scholarship **2013-2014**
Da Nang University of Science and Technology *Da Nang, Vietnam*
